#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Objections***

Claims 14 and 16 are objected to because of the following informalities:

Claims 14 and 16, both depend upon themselves. It will be presumed that claim 14 depends on independent claim 14 and that claim 16 depends on independent claim 15.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-8 rejected under 35 U.S.C. 102(b) as being anticipated by Kato (U.S. Patent No. Des. 393,972).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kato as applied to claims 1-3 and 5-8 above.

With respect to Claim 4, Kato is advanced above. It is unclear as to what distance the flange of Kato extends. However, it would have been an obvious dimension the flange of Kato

as specified in Claim 4, line 3 because one of ordinary skill would have been expected to have routinely experimented to determine the optimum dimensions for a particular use.

Claims 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kato as applied to claims 1-3 and 5-8 above, and further in view of Butler (U.S. Patent No. 4,444,359).

With respect to Claims 9-14, Kato is advanced above. Butler, Figures 1-5, teaches a dispenser mounted within a wall. It would have been obvious to one of ordinary skill in the art to mount the dispenser inside the wall, as taught by Butler, for the purpose of hiding the dispenser. It is unclear as to what distance the body of the dispenser of Kato in view of Butler extends into the wall. However, it would have been an obvious dimension the flange of Kato as specified in Claim 9, line 8 because one of ordinary skill would have been expected to have routinely experimented to determine the optimum dimensions for a particular use.

### ***Conclusion***

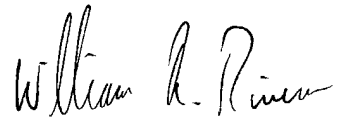

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
